### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-8 rejected under 35 U.S.C. 102(a) as being anticipated by Jansen et al. NIST Special Publication 800-19 – Mobile Agent Security (hereafter Jansen).

- 1. As per claims 1-3, Jansen teaches a mobile application (MA) security system (title, pg. 2 and section 3.2, bottom paragraph on page 9), comprising; one or more hosts connected to the server computer, each computer executing the mobile application that jumps between the hosts during execution(see pg. 2, pg. 17, section 4.1.4, 4.1.5), central computer for controlling the security of a MA(pg. 18-19 section 4.2 Protecting Agents); the central computer comprising means for monitoring the security of the MA as it jumps between hosts computers wherein the MA is communicated from a first host to a second host it passes through the central computer(see pg. 18-19 section 4.2 protecting agents), wherein the security monitoring means further includes detecting code of the mobile application marked as immutable and means for replacing the immutable code with code known to be safe by the central computer(see pg. 10, 18-19).
- 3. Further, as per claim 3 for disclosing wherein the security monitoring means further includes for detecting an itinerary of the mobile application that is marked as immutable and

Application/Control Number: 09/758,941

Art Unit: 2131

means for replacing the immutable itinerary with an itinerary known to be safe by the central computer, is taught by Jansen(see section 4.2.2 and 4.2.3 pg. 21-22).

- 4. As per claim 4, Jansen teaches wherein the itinerary includes past historical itinerary data(see pg. 17, section 4.1.5).
- 5. As per claim 5, limitations have already been addressed(see claim 1). Further, Jansen teaches receiving a mobile application each time the mobile application is jumping between a first host and a second host(see pg. 18-19, section 4.2); monitoring the security of the mobile application as it jumps between the host computers(see pg. 18-19).
- 6. As per claim 6, limitations have already been addressed(see claims 1 and 6 above).
- 7. As per claim 7, limitations have already been addressed(see claims 3 and 5 above).
- 8. As per claim 8, recites same limitations as claim 4.

### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jenise E Jackson whose telephone number is (703) 306-0426. The examiner can normally be reached on M-Th (6:00 a.m. - 3:30 p.m.) alternate Friday's.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ayaz Sheikh can be reached on (703) 305-9648. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 305-0040 for regular communications and (703) 308-6306 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-3900.
